Budget (Include an estimate of total project cost, partner contributions & any other leveraged funds):

Project timeline (Estimate a range of time): _____

Anticipated measure of project success (i.e. desired outcomes):

This RC&D Project Application is to be developed jointly by the Project Sponsor and the RC&D staff. It is then submitted to the Missouri & Mississippi Divide RC&D Council.

The application will be considered in relation to the RC&D Business Plan, existing Council priorities, and staff workload. The amount of interest shown by individuals or groups willing to work on the project, the ability of the sponsor to carry projects through to completion, and the feasibility of this specific project are important criteria for consideration. If the Council determines that the project is well conceived, will help achieve the RC&D's rural development goals, and if it can be addressed in a timely manner, the application will be approved.

Official approval of the project by the M&M Divide RC&D Council allows the RC&D staff to work closely with the Project Sponsor to provide appropriate assistance. It also allows the Council to make various RC&D resources available to help complete the project. The Project Sponsor will be required to submit project reports and periodic updates to the M&M Divide RC&D Council. The RC&D Council will determine the reporting schedule on an individual project basis.

Agreed to by Applicant/Sponsor:
